Stingray Systems S9300 Tepid Emergency System

Model: S9300

The S9300 Tepid Emergency System shall consist of a water heater storage tank and 120V 20AMP heating element. The S9300 Tepid Emergency System shall incorporate 2 emergency mixing valves capable of controlling outlet temperature over a wide range of demand requirements. The mixing valves shall employ a liquid-filled thermostatic motor and a stainless steel sliding piston control device. The valves shall offer positive hot water shut-off in the event of cold water supply loss and full flow cold water bypass in the event of hot water supply loss or thermostatic failure. The system shall also incorporate a device capable of flattening temperature spike through the system as well as a heat trap to prevent heat migration to the cold side of the mixing valves. Unit supplied complete with pre-piped 118 gallon storage tank, 120V 20AMP heating element, patented accumulator, SV125 and SV107 Emergency Mixing Valves. Approximate weight empty = 600 lbs. The hot water tank is UL listed, heating element is CSA approved and the housing has either a Nema 1, 4 or 7 rating.

The modular design will allow for modifying the specs of eyewash without replacement of the whole unit.

This system, combined with a Stingray Emergency shower or combination shower and eye/face wash is a complete tepid solution that is ANSI/ISEA Z358.1 compliant. Please select the correct fixture per the application.
